An improvised airfield, about 3,300 x 3,300 feet, was located about three miles north of the LENINGRAD Red October 466. Plant, about 1,000 feet east of the road to VYBORG (28°45%/60°42°N) and north of a woods.

- Thirty biplanes and four single-engine fighters (threebladed propeller, low-wing monoplanes, wingspan about 25 feet) were stationed at the field.
- There was intensive flying at the field with five biplanes which practiced acrobatics.

Jomment:

Information confirms a previous report. It is assumed that basic pilot training is conducted at this field. A "DOSAV" flying school is possibly located there.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1973 from the Director of Central Intelligence to the Archivist of the United States.
